An Enhanced Level Of Comfort Before And After Your Purchase

When it's time for a new indoor comfort system, you shouldn't have to sweat the decision of which manufacturer to choose. The legendary Nexgen brand, trusted by generations for its performance and reliability, gives you one less thing to worry about. Choose Nexgen brand APG14M and APG16M Packaged Gas Electric Unit with confidence, knowing you're getting the world-class engineering and good ol' American craftsmanship you've come to expect from the Nexgen brand.

Gas And Electric Functionality Make This The Total Package

Operated as an electricity-powered air conditioner in the summer and a gas-fueled furnace during the winter, a Nexgen brand APG14M and APG16M Packaged Gas Electric Units offer years of cost-effective, worry-free indoor comfort from a single, self-contained unit. Providing the protection of two lifetime warranties*, units can deliver cooling or heating capacity from two to five tons, a Seasonal Energy Efficiency Ratio (SEER) of up to 16 and 81% Annual Fuel Utilization Efficiency (AFUE).

You'd Be Hard Pressed To Find A Better Compressor

Perhaps this packaged unit's most important component in terms of cooling efficiency and performance is the compressor — the heart of this system's summer operation. The Nexgen brand APG14M and APG16M Packaged Gas Electric Units feature an energy-efficient scroll compressor, which is designed with fewer moving parts that result in lower energy use compared to units with reciprocating compressors.

The Security Of The Nexgen Brand's Amazing Lifetime Warranties*

To truly seal the deal, the Nexgen brand APH16H and APH16M Packaged Heat Pumps are backed by one of the best warranties* in the industry. This unit features a Lifetime Compressor Warranty* and a 10-Year Parts Lifetime Warranty*. The longevity of premium Nexgen brand products combined with this excellent warranty* coverage offer you a level of purchase protection that's the stuff of legend.

Energy Efficient

Energy efficiency equates to cost savings. Nexgen brand APG14M and APG16M Packaged Gas Electric Units offer up to 16 SEER performance during the summer months. "SEER" stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the cooling efficiency of air conditioners and heat pumps. The higher the SEER, the greater the efficiency—and the lower the operating cost. Compared to lower SEER units, a Nexgen brand Packaged Gas Electric Unit can provide significant savings on your electric bill.

Quiet Comfort

You can be assured that your Nexgen brand packaged heat pump will provide you with quiet operation. To minimize operating sounds, we've combined quiet scroll compressor technology with a high-density foam cover plus a fully-insulated blower compartment to provide unobtrusive performance.

* Complete warranty details available on www.nexgenairandheat.com. To receive the Lifetime Unit Replacement Warranty (good for as long as you own your home) and 10-Year Parts Lifetime Warranty, in order to qualify for lifetime replacement warranty you need to be part of the X Protection Family. Membership must be current and up-to-date.

The Next Generation in Home Comfort

THE IMPECCABLE REPUTATION OF THE
FASTEST GROWING HVAC COMPANY

Nexgen brand heating and cooling systems are a part of the enduring legacy of one of California's most recognized and respected companies. Nexgen Air Conditioning Heating and Plumbing is synonymous with long-lasting, premium quality products — from home automation to heating and air conditioning equipment. To provide a truly exceptional customer experience we've partnered with the world's largest manufacturer for heating and cooling systems and they're made right here in the U.S.A.! Generations to come will continue to enjoy the dependable performance and longevity of our Nexgen brand.

Efficient Cooling Capacity

5 millimeter (select models) refrigeration grade premium copper tubing and aluminum fin condenser coil configuration delivers outstanding heat transfer properties.

All-Aluminum Evaporator Coil

A single metal solution that is designed for enhanced durability and performance (select models).

Stainless Steel, Tubular Primary Heat Exchanger

Distinctive heat exchanger employs wrinkle-bend technology which was developed to deliver extraordinary durability and long-term reliability.

Variable-Speed Ecm Blower Motor

Provides quiet system startup and shutdown with highly-efficient performance. (16 SEER models only).

Refrigeration-Grade Premium Copper Tubing And Aluminum Fin Condenser Coil Configuration

Delivers outstanding heat transfer properties with R-410A refrigerant.

Heavy-Gauge Galvanized Steel Enclosure With Powder-Paint Finish

Protects your system from extreme outdoor elements.

Fully-Insulated Blower Compartment

Designed for quiet performance. Panels are conveniently located to provide easy access.

Self-Contained Packaged Unit

Designed for multi-position installation.
